

Ear Clear Plus

Type	Safety	Efficacy	Recommended?
			
Branded dietary supplement	Some potential for harm	No evidence that it is effective	No

In detail:

The makers claim	It is claimed that Ear Clear Plus works by “reducing the inflammation that affects people’s ability to hear.” ¹
What is the treatment?	Ear Clear Plus is a capsule. ¹ The ingredients of Ear Clear Plus are listed as Vitamin C, niacin, Vitamin B6, folic acid, Vitamin B12, hawthorne leaf and flower, garlic, olive leaf, hibiscus flower, buchu leaf, uva ursi, juniper berry, green tea ¹ .
What are the downsides of this treatment?	Potential side effects, allergic reactions and drug interactions from constituents. ²⁻¹⁴ Cost. Ear Clear Plus costs \$70 for 30 days supply ¹ .

Tinnitus UK try very hard to make sure our information is right, but this information should not be taken as medical advice. You should always check with your doctor before trying any tinnitus treatment.

Has there been research into this treatment?	There have been no papers published on Ear Clear Plus as a supplement, but there have been a number published on its component parts.
What does the research say?	There is no evidence that any of the known components of this supplement are effective for treating tinnitus. ²⁻¹⁴ Although some of the components are thought of as safe, some may be harmful including Vitamin B6 and Uva ursi (if taken for prolonged periods) ^{4,12} and green tea in large doses ¹¹ . Uva ursi and buchu should be avoided in pregnancy ^{11 12} .
How high quality is the research?*	A-D
Tinnitus UK's opinion on this treatment:	Although independent evidence is limited, what there is does not show that the components of this supplement are effective for tinnitus and that there may be risks involved in taking this supplement. We would suggest you talk to your GP before taking any new medication or supplement. "Dietary supplements should not be recommended to treat tinnitus." ¹⁶
Would Tinnitus UK support further studies into this treatment?	No.
Comments	There appears to be a lot of similarity between the marketing and make up of this product and other products such as Tinnitus 911 and Silencil – please see the relevant information sheets for details.

* A = Systematic review/meta analysis. B = Randomised control studies. C = Cohort studies. D = Case control studies. E = case studies/reports. +/- to be used to indicate quality within bands
